Technology Legend

Smart Sensor™ Technology

Built-in sensors deliver automatic functionality like answering a call by placing the headset on and simultaneously updating softphone availability status.

Adaptive Power

Adaptive power system optimizes for range and talk time by automatically downshifting to low power when the headset is close to the base/USB adapter to save battery life and maximize density.

A2DP

A Bluetooth® profile that allows high quality audio content to be streamed from one device to another through a Bluetooth connection. Listen to streaming media, music and navigation wirelessly through your headset.

AudioIQ²

Keeps calls clear, regardless of the environment. Automatically adjusts incoming calls to a comfortable listening level.

SoundGuard

Sound leveling for listening comfort and acoustic limiting for protection against sounds above 118 dBA.

SoundGuard DIGITAL

All the benefits of SoundGuard, plus anti-startle protection which detects sudden increase in sound and eliminates the increase, and Time Weighted Average (TWA) measurement which prevents average daily sound exposure from exceeding 85dBA.

Wideband

Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
