

A black and white photograph of a Plantronics Savi Series headset and its base station. The headset is on the left, with its boom microphone extended. The base station is on the right, with a charging cradle. The background is dark, and the foreground is a light, reflective surface.

PLANTRONICS
Savi™ Series

Communicating and Collaborating

IM, web conferencing,
webinar, podcast, video,
voice messages...

**Behavior is
changing across
the enterprise**

Unify our communications

Conference calls,
scheduled call meetings

Conference calls, texting,
podcast, video, voice
messages...

PC as a Phone

Multipurpose and great for presence information and IM:

- But not voice optimized

PC features that complicate UC calling:

- Security lock out
- Multiple audio programs AND telephony
- Not the 'phone' people are used to
- Privacy issues

Headsets can solve much of this...

Plantronics UC Value Proposition

Provide products that improve communications and collaboration

- Cross platform
- Cross devices
- Cross applications

Drive adoption by optimizing end user experience

- Highest quality products
- Ease of use
- State of the art design

Mitigate IT Risk when piloting and deploying UC

- Breadth of solutions while minimizing TCO
- Ease implementation, plug it in and it works
- Global support and services

Why Wireless in a UC world?

Changing the way we work, staying productive

- More scheduled conference calls
- Live presentations over the Internet
- Webinars, Webisodes, Podcasts
- Real-time collaboration leading to voice communications
- Unified messaging with email voice mail

Where do wireless headsets make sense?

Research says...

Low-context interruptions quick calls – very little headset usage

High-context ad-hoc longer calls – some headset use

PC calls, scheduled, conference calls – majority use a headset

“...a million meeting minutes on audio conferencing per day.” Intel

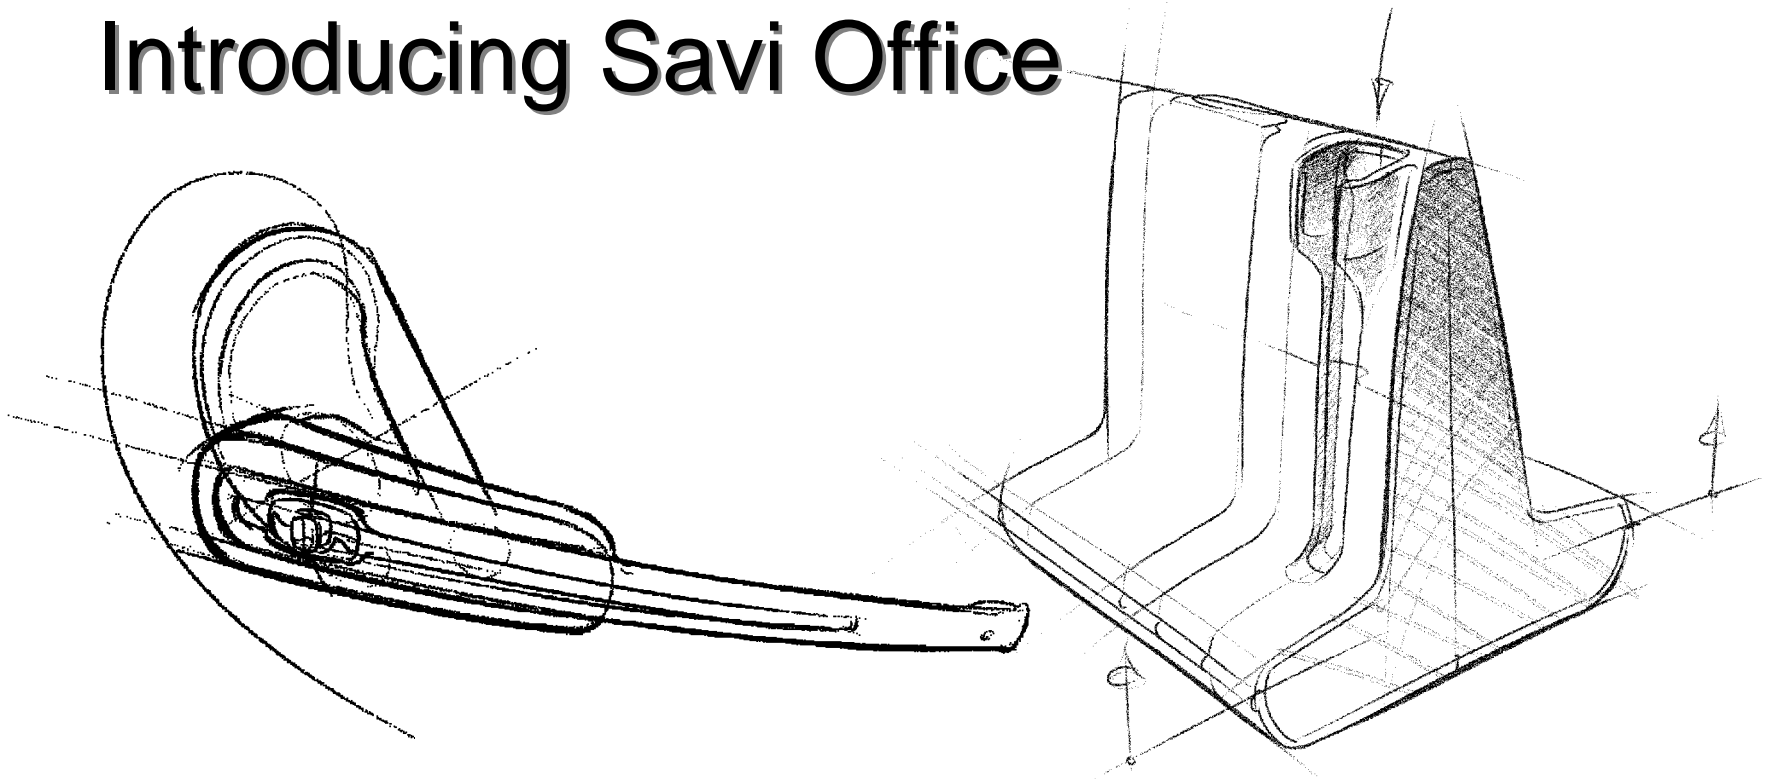

PLANTRONICS

PLANTRONICS
Savi™ Office

Introducing Savi Office

- ✓ **Cross platform, cross device, cross application**
- ✓ **State of the art design**
